

FORGE

FORGE — Investigations overview

The investigative spine: automated case creation, AI-guided intake, and cryptographic evidence integrity with complete auditability.

WHAT'S INSIDE

- Where intelligence becomes documented, auditable action
- CaseOps — automatic case creation at risk thresholds with entity-centric timelines
- Intake — AI-guided reporting, categorized and routed automatically
- Chain — SHA-256 evidence hashing, tamper detection, and a complete audit trail
- Authenticated export for legal and IG proceedings
- Classification means platform access controls — not classified-data handling

WHO IT'S FOR

For investigators, analysts, supervisors, and command staff who need defensible, auditable case operations.
