

PATHWAY

PATHWAY — Travel Security overview

The automated mobility protection layer: AI-generated briefings, risk-tiered workflows, and in-travel monitoring.

WHAT'S INSIDE

- Automation first, analysts by exception — protection that scales without headcount
- Brief — AI-generated briefings designed to save 2–4 analyst-hours per traveler
- Risk — multi-factor scoring that decides the workflow: brief, pre-brief, or debrief
- Beacon — 24/7 in-travel monitoring and emergency response, opening a FORGE case on activation
- Supports ISO 31030 compliance programs
- The human role in high-risk decisions

WHO IT'S FOR

For travel risk managers, security operations, and duty-of-care programs protecting a mobile workforce.
